SmartSync Lite™

20 Bed Nurse Call System

Overview

SmartSync Lite™ is supplied as a complete 'wireless' nurse call system in a box and serving up to 20 beds. It is ideal for smaller installations that require standard nurse call functionality.

Alternatively, the solution can be used as a temporary system during phased upgrade works or as emergency back-up for a hospital's existing nurse call provision.

SmartSync Lite™ uses exactly the same equipment as SSG's market-leading Aspire SmartSync® system .

Teams opting to use SmartSync Lite™ as a permanent solution can easily add on additional Over Door Indicators and call points, incorporating enhanced functionality to help with task management and connect to a LAN.

Additional endpoints can be added where specifically requested and SSG can provide installation services.

Features & Benefits

Scalable 'wireless' nurse call solution:

- Easily add on additional devices from the Aspire SmartSync® range
- Upgrade options to assist with task management
- IP connectivity and LAN connection
